

2019 Iq Innovative Robot Challenge

Goal

Submit a creative 60 to 90 second video showing how your working robotic design brings value to society within any environment. This is a **FREE** challenge and you do not have to be present at the event.

Who Can Play

Teams in this challenge compete in **one division**, typically:

- Elementary School + Middle School + High School + Big Kids

Requirements

Autonomous or remote controlled robot, any platform, costing \$1,500 USD or less:

- Video **must** include:
 - Your robot's name
 - What your device's purpose
 - All sponsorship logos related to the challenge, including RoboRAVE International
 - First Names of each team member
 - Name of the community being represented

All team members **must** have an active part within the video...(not just pictures).

- Any use of music must be royalty-free with **at least the artist and title of the piece** listed in the video.

Challenge Specifications

Upload the final video to your Team Profile (MP4 format).

- 1) Contact the event to let them know when it's ready.
- 2) RoboRAVE staff will **review and post to YouTube**.
- 3) We will send you a confirmation your video has been posted.

Failure to comply with any or all of the requirements will make your entry ineligible.

Scoring

The winning team will be announced at the event's awards ceremony.
